Aircraft Electrical System Schematic

This paper deals with the digital electrical flight control system of the Airbus

A320/A330/A340. The A320 was the first civil aircraft equipped with such a system. It was certified and entered into service in the first quarter of 1988. The A330 and A340 have identical systems, closely related to the A320 system.

Airbus introduced its innovative Brake to Vacate technology on the A380, allowing flight crews to more effectively manage approach and landing by pre-selecting the optimum runway exit. This can reduce runway occupancy time by up to 30% - significantly increasing the number of aircraft that can be handled by the world's airports.
