Male suicide has been described as a “silent epidemic”. Despite the high incidence and level of contribution to men’s mortality, it is the lack of public awareness that makes this epidemic so silent. In the UK, suicide is the highest cause of death among men under the age 45. In fact the highest suicide rate in the UK is recorded for men ...

The outbreak of foot-and-mouth disease in the United Kingdom in 2001 caused a crisis in British agriculture and tourism. This epizootic saw 2,000 cases of the disease in farms across most of the British countryside. Over 6 million cows and sheep were killed in an eventually successful attempt to halt the disease. Cumbria was the worst affected area of the country, with 893 cases.

polio - polio - Polio through history: Polio epidemics did not begin to occur until the latter part of the 19th century, but evidence indicates that polio is an ancient disease. A well-known stele from the 18th dynasty of ancient Egypt (1570–1342 bce) clearly depicts a priest with a telltale paralysis and withering of his lower right leg and foot.

The dynamics of an epidemic, for example, the flu, are often much faster than the dynamics of birth and death, therefore, birth and death are often omitted in simple compartmental models. The SIR system without so-called vital dynamics (birth and death, sometimes called demography) described above can be expressed by the following system of ordinary differential equations:
