Constructing A Language A Usage Based Theory Of Language ...

A constructed language is a language whose phonology, grammar, and vocabulary, instead of having developed naturally, are consciously devised. Constructed languages may also be referred to as artificial languages, planned languages or invented languages and in some cases, fictional languages. Planned languages are languages that have been purposefully designed. They are the result of deliberate controlling intervention, thus of a form of language planning. There are many possible ...

Constructed language - Wikipedia

Usage-based linguists reject the innateness hypothesis of generative grammar and with it the traditional distinction between grammar and usage, or competence and performance. In this approach, language consists of fluid structures and probabilistic constraints that are shaped by communication, memory, and processing.

language can be seen as a complex adaptive system (Hopper 1987, Larsen-Freeman 1997, Ellis and Larsen-Freeman 2006). The primary reason for viewing language as a complex adaptive system, that is, as being more like sand dunes than like a planned structure, such as a building, is that language exhibits a great deal of variation and gradience.

1 A usage-based perspective on language

Usage-based theory takes language to be an embodied and social human behaviour and seeks explanations in that context. This theoretical perspective incorporates the basic insight that usage has an effect on linguistic structure. This chapter discusses the following: background of usage-based theory; domain-general processes; exemplars, networks, and constructions; the role of repetition ...
