technologies. The ninth edition concentrate on three main areas: BI, data mining, and automated decision support (ADS).

Decision Support and Business Intelligence Systems

The data-driven, global business environment requires increasingly sophisticated decision support, analytics and business intelligence. Also, changing technologies including mobile devices and cloud computing have created new opportunities for computerized decision support and an increasing need for technology support of business decision making.

Decision Support, Analytics, and Business Intelligence ...

BUSINESS INTELLIGENCE IN DECISION SUPPORT SYSTEMS. A decision support system (DSS) is a computer-based information system that supports business or organizational decision-making activities; typically this results in
