### Diagnostic Pathology Gastrointestinal Published By Amirsys

Malakoplakia is an uncommon, tumor-like inflammatory disease characterized by impaired histiocytes that are unable to completely digest phagocytized bacteria. The genitourinary tract is the most common site of involvement, however, cases have also been described in the gastrointestinal tract, suggesting that it is the second most common site of involvement. This study investigates the clinical ...

Immunohistochemistry and special stains play an increasingly important role in gastrointestinal pathology practice. In neoplastic disorders they are used to confirm the diagnosis, identify prognostic/predictive features, and screen for an underlying genetic syndrome. In nonneoplastic disorders they can identify an infectious organism, clarify the inflammatory infiltrate present, and confirm a ...
