Universal grammar (UG), in modern linguistics, is the theory of the genetic component of the language faculty, usually credited to Noam Chomsky. The basic postulate of UG is that a certain set of structural rules are innate to humans, independent of sensory experience. With more linguistic stimuli received in the course of psychological development, children then adopt specific syntactic rules ...

1 Introduction . This document defines the OWL 2 language. The core part of this specification — called the structural specification — is independent of the concrete exchange syntaxes for OWL 2 ontologies. The structural specification describes the conceptual structure of OWL 2 ontologies and thus provides a normative abstract representation for all (normative and nonnormative) syntaxes of ...

Clarity rating: 4 The grammar presentation is contextualized in an unnecessarily complicated way. The grammar drills use fairy tale characters and mix up details from individual fairy tales, which adds another level of complication. Students need to review all of these fairy tales in order to follow to complete the grammar drills correctly.

This is the second sense in which our "artifact" category is obsolete. In short, Sperber seems to suggest, if we cannot shake the Paleolithic urge to center the "artifact" category on the paradigmatic bracelets and jars, we should jettison the category altogether, for the sake of an epistemologically adequate social science.
