File Type PDF Nastran Documentation

NEi Nastran is a general purpose finite element analysis solver used to analyze linear and nonlinear stress, dynamics, and heat transfer characteristics of structures and mechanical components. It is available on a variety of platforms including 32/64-bit Windows and Linux. This software was acquired by Autodesk in May 2014.

Nastran - Wikipedia

Dynamic Load Tabular Function, Form 1
Description: Defines a tabular function for use in generating time-dependent dynamic loads. Format: Example: Field Definition Type Default TID Table identification number. Integer > 0
Required XAXIS Specifies a linear or logarithmic interpolation for the x-axis, one of the following character variables: LINEAR or LOG
