Parasites And Skin Diseases Allen

Parasites. Veterinary parasitology studies both external and internal parasites in animals. External parasites, such as fleas, mites, ticks and mosquitoes can cause skin irritation, and are also often carriers of other diseases or of internal parasites. External parasites. Ear mites and other mites can cause skin problems such as mange.

Cat health - Wikipedia

Onchocerciasis, also known as river blindness, is a disease caused by infection with the parasitic worm *Onchocerca volvulus*. Symptoms include severe itching, bumps under the skin, and blindness. It is the second-most common cause of

Onchocerciasis - Wikipedia

While we've all heard of diseases, seen someone with a disease, and had a disease personally, it's unlikely that we've encountered a rare disease. In the non-medical world, people use and interchange disease to mean infection, sickness, illness, or something similar. In the medical world, a disease is an abnormal condition that impairs bodily functions and is often associated with ...
