The typical pulp magazine was seven inches wide by ten inches high, half an inch thick, and 128 pages long. Pulps were printed on cheap paper with ragged, untrimmed edges. The name pulp comes from the cheap wood pulp paper on which the magazines were printed. Magazines printed on better paper were called "glossies" or "slicks."

Pulp Fiction was released in fall 1994, around the time that Mad TV debuted on Fox. One of that show's earliest skits was a mashup called Gump Fiction, mostly recreating scenes from Pulp Fiction but with Forrest Gump taking the place of Vincent Vega. (Forrest Gump and Pulp Fiction were the two most hyped films of

that year.)

Pulp Fiction (1994) - Trivia - IMDb

Polarization Index, or PI, is a ratio of the megohms after 10 minutes divided by the megohms after 1 minute. This test is primarily conducted on form wound motors and generators. An instrument records megohm data over the 10 minutes, and the resulting graph and PI ratio can provide additional information about the winding insulation beyond the ...
