Johan Rockström says humanity has already raced past four of the nine boundaries keeping our planet hospitable to modern life. Writer John Carey digs into the “planetary boundary” theory — and why Rockström says his isn't, actually, a doomsday message. We've been lucky, we humans: For many millennia, we've been on a pretty stable — and resilient — planet.

Hi, The best remedy to avoid the above mentioned problems, we must adopt agile methodology while creating a website. The project is divided in small iterations, which are well discussed with the client before initiating and after completing each phase. This leaves a little scope for dissatisfaction at the client's end. By the time the project is completed, all the queries of the client are solved.
